

Dear Customer,

REACH SUBSTANCES OF VERY HIGH CONCERN

As you know, the EU Regulation on the Registration Evaluation Authorization and Restriction of Chemicals (REACH) is now in effect. REACH places strict controls on substances which are identified as substances of very high concern (SHVCs). In particular, notification is required throughout the supply chain for SHVCs at concentrations above 0.1% in each component of an article.

As of March 15, 2017, no Magnetic Seal products contain SHVCs within any component part at the reporting threshold of 0.1%.

Best regards,

Jeff Colby
