

Dear Customer,

REACH SUBSTANCES OF VERY HIGH CONCERN

As you know, the EU Regulation on the Registration Evaluation Authorization and Restriction of Chemicals is now in operation. REACH places strict controls on substances which are identified as substances of very high concern (SHVCs). In particular notification is required throughout the supply chain for SHVCs at concentrations above 0.1%.

As of 9/23/2011, No Magnetic Seal products contain SHVCs at the reporting threshold of 0.1%.

Best regards,

Jeff Colby
